ADDRESS CHECKS

TYPE	PHISICAL	ID BASED	VERISPOT
WHAT	A physical visit to the address confirms the residence. Verification with the subject, landlord, family members is done. Details like residential tenure and type of residence are confirmed.	A tally of the address on the resume or CV or application form is done with the address on a government issued ID proof of the candidate. An address match is a green signal, and the candidate is cleared.	Specially curated Verifacts technology is used here. Our Analyst guides candidates through an SMS system. An address pin triggers the GPS location of the candidate which is then recorded and tallied.
WHEN	This extensive check is done when red flags are raised or if more information is required.	This cursory check on raising red flags is converted into a physical check.	The pandemic has highlighted the need for no contact, safe and swift checks by Verispot.
